

Presenting: "OneTrack-Post"

The One-Stop Postproduction Solution for any film or video project, big or small.

Damen Digital's "OneTrack-Post" package is your one-stop, integrated, postproduction solution, designed to make the life of video production companies a lot easier. Integrated, because the package is not limited to the obvious steps of video & audio editing, mastering and DVD-authoring.

The package includes all graphic and pre-marketing aspects such as conceptualizing, art-design, web & print design, sound design, marketing preparation, translations, conversions, languages, titles, subtitles, etc.

"OneTrack-Post" is flexible. Of all the steps, just pick those you want to outsource. Also, you can jump on the train at any "station", anywhere on the track. If possible, we will quote you in advance for the labor cost for the entire track and estimate other additional expenses.

Provide script and footage, and we'll perform, a few, most or all of these steps:

- Pre-post **script and footage assessment** : Raw materials, script & content briefing, determination of format and conversion requirements.
- Pre-post **art-direction concept**: Establishing Look & Feel for the entire production, setting marketing goals and decide on materials.
- **Rough Cut Video and Audio**, determining needs for additional B-Roll, stills, Visual Effects and Foley.
- Overall **Production Design** for everything graphic, from titles to DVD-cover.
- **Motion Graphic Design**: Lower thirds, animations, animated DVD-backgrounds and menus, etc. Flash animation for the Web.
- **Visual Effects**: Design, preparation, execution proposal.
- **Graphic Design** for print and web pages: Poster, brochure, leaflet, ads, Web Site.
- **Sound Design**: Music selection, original score, narrative, voice-overs, ADR (Automated Dialogue Replacement).
- **Fine Cut Video and Audio**, implementing visual effects; soundtrack mastering.

- **Color Correction** and conceptual grading.
- Design and execution of **title sequences** and credits.
- **DVD-Design & Authoring:** Assembling premier and bonus materials, menus, angles, languages, close captioning, subtitles, etc.
- Final fine-tuning and **market-specific conversions** for diverse delivery systems (from iPod to HDTV-widescreen), and TV-systems, NTSC, PAL, SECAM.
- Finishing **marketing materials** including movie-trailers.

Collaborative effort:

The project director or executive producer(s) can be as much involved in all aspects of the postproduction track as is desired. Arrangements for On-Site Lodging and catering are part of the package.

We'll do everything we can, to make your project as professional and successful as possible. OneTrack-Post is the easy way to go!

For rates, click on the link 'Rate Sheet' at the bottom of the main page of our web site.
